PROFESSIONAL SUMMARY

Data Analyst & BI Analyst who identifies real business problems before writing a single line of code. Built Open Data Copilot — an AI-powered data platform used by analysts to automate the 70% of work that isn't actual analysis — alongside a Random Forest ML model (R^2 0.8943), Star Schema BI dashboards, and DAX-powered KPI reports across 4 live projects using SQL, Python, Power BI, and Excel. Seeking a Data Analyst / BI Analyst internship — open to Remote or Delhi NCR roles.

CORE SKILLS

Excel & Reporting: Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Conditional Formatting), Ad-hoc & Recurring Reporting

SQL & Databases: MySQL, SQL Server, PostgreSQL, Joins, Aggregate Queries, CTEs, Window Functions, Views

Power BI & Visualization: Power BI Desktop, DAX (CALCULATE, FILTER, SUMX), Power Query, Data Modeling, Star Schema, KPI Dashboards, Drill-through, Data Storytelling, Data Validation

Python & Machine Learning: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit, Predictive Analytics, Feature Engineering

Analytics & Tools: ETL, Data Cleaning, EDA, Statistical Analysis, Business Intelligence, Git, GitHub, Jupyter Notebook, Generative AI, Prompt Engineering, LLMs (Groq, Gemini API), DuckDB.

PROJECTS

Open Data Copilot — AI-Powered Data Intelligence Platform | [GitHub](#) | [Live Demo](#)

Tech Stack: Python, DuckDB, FastAPI, Groq (LLaMA 3), React, PostgreSQL.

- Talked to 5 senior data analysts — identified that 60–70% of analyst time is lost to data preparation, not analysis — then built an end-to-end platform to automate the full pipeline from raw upload to business insight.
- Engineered a conversational NL→SQL→DuckDB execution pipeline with Trust Score (0–100) — every insight is backed by executed rows against real data, not AI-generated text; integrated AI Data Doctor flagging Critical, Warning, and Attention-level data quality issues.
- Shipped 251 automated tests across 27 files with full E2E validation; presented at IIT Patna — reversible cleaning studio with undo/redo and version lineage keeps analysts in full control throughout.

LinkaLyze — LinkedIn Job Market Analytics Dashboard | [GitHub](#)

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI

- Cleaned, validated and standardized 123K+ raw LinkedIn job postings, as measured by resolving missing values across 15+ columns (up to 76% missing in salary fields) and removing 1,368 duplicate records, by applying mean/median/mode imputation in Python (Pandas) — producing a final dataset of 122K+ clean records.
- Built an interactive hiring intelligence dashboard with dynamic slicers for pay period, work type, and posting domain — surfacing an average salary of ₹91,965.83 across 6 experience levels and 5,000+ locations.
- Developed DAX-driven ranking visuals in Power BI to identify highest-paying job titles and top hiring companies — revealing roles like Marketing Director and firms like Liberty Healthcare by aggregate maximum salary.

Flight Price Prediction System | [GitHub](#) | [Live Demo](#)

Tech Stack: Python, SQL, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Power BI, Streamlit

- Cleaned and engineered 10,463 flight records, as measured by achieving an R^2 of 0.8943 and MAE of ₹658.92, by building a Scikit-learn Random Forest pipeline with feature engineering (date, duration, stop-count extraction) and one-hot encoding.
- Wrote 30 SQL queries (aggregations, window functions, CTEs) to uncover airline pricing patterns across 12 airlines and 128 routes — surfacing avg fare of ₹9,027 and route-level fares up to ₹79,512 to drive feature selection and dashboard design.
- Built 3 interactive Power BI dashboards (Airline Performance, Price Analysis, Route Analysis) and deployed the trained model as a live Streamlit web app — enabling real-time fare prediction and route-level trend exploration for end users.

Sales Analytics Dashboard | [GitHub](#)

Tech Stack: Excel, Power BI, Power Query, DAX, Data Modeling (Star Schema)

- Cleaned and modeled 17,560 raw sales records into a Star Schema, as measured by preparing a fully structured, query-optimized dataset across products, dates, customers, and promotions, by using Power Query for data cleaning and transformation within Power BI.
- Designed a 4-page interactive dashboard using custom DAX measures — covering Top/Bottom 5 products, sales-vs-profit trends, and discount by category, with side-by-side comparison of any two user-selected time periods.
- Created a fully filterable order-level report across 17,560 transactions — surfacing sales, profit, discount, and net sales by product, date, customer ID, promotion category, and city via dynamic Power BI slicers.

INDUSTRY VIRTUAL SIMULATIONS

Tata Group — GenAI Powered Data Analytics | [Forage](#)

Jul 2026

- Performed exploratory data analysis, generated business insights and communicated analytical findings using Generative AI-assisted workflows.

JPMorgan Chase & Co. — Quantitative Research | [Forage](#)

Feb 2026

- Built quantitative pricing models and performed credit risk analysis using FICO segmentation under simulated financial scenarios.

Deloitte — Data Analytics | [Forage](#)

Jan 2026

- Conducted data cleaning, EDA, visualization, and forensic analytics in Excel and Python to generate client-ready business insights.

EDUCATION

Indian Institute of Technology, Patna <i>B.Sc. in Computer Science and Data Analytics (Hybrid) CGPA: 8.8</i>	Aug 2024 – Expected 2027
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology, Computer Science Engineering CGPA: 7.7</i>	Sep 2024 – Expected 2028

CERTIFICATIONS

- Foundation Certificate in Computer Science and Data Analytics - [IIT Patna](#) (Sep 2025)
- Data Analytics Bootcamp - [UDEMY](#) (Sep 2025)
- Python Programming - [UDEMY](#) (Apr 2025)

ACHIEVEMENTS

- **First Place Winner:** Won Idea Ignite 2026 Startup Pitch Competition, ACET Aligarh — 1st place among 50+ participants including B.Tech final year teams, presented Open Data Copilot as a production-ready data product to faculty jury.
- **Industry Validation:** Open Data Copilot reviewed by a practicing Data Analyst at Accenture (2.5 years exp.) — validated as production-ready and effective at answering real business questions.
- **Portfolio:** Built 8+ end-to-end Data Analytics Projects.
- **Hackathon:** Ranked 22/100+ participants in HackDays, IIT Patna Hackathon.
- **Competitive Coding:** 4-Star Python Coder at HackerRank.
